- <https://bscscan.com/address/0xEa2697D53990ADD3d8512B06407851bA648B9Fd3>

We have run an extensive static analysis of the codebase as well as standard security assessment utilizing industry-approved tools. There are no critical/high-level issues with the currently deployed token contract. Our low-level and medium-level findings are available in the next section.

2. Audit Findings

Low Level Findings

- ❖ Taxes are not locked. However this is acceptable since community may define them through the project. Consider locking the tax after defining a fair tax with the community.

3. Conclusion

In this audit, we thoroughly analyzed the Blok Beach Club smart contract and found no critical/high-level issues.

✓	No critical issues found
✓	Contract owner cannot mint
✓	Contract cannot be locked
✓	Token cannot be burned
✓	Ownership/Operator is renounced
✓	Contract cannot be manipulated by owner functions

4. Disclaimer

This report is not advice on investment, nor does it guarantee the adequacy of a business model and/or a bug-free code. This report should be used only to discuss known technical problems. It will be necessary to resolve addressed issues and conduct thorough tests to ensure the safety of the smart contract.
