This report was written to provide a security audit for Fight 4 Hope (https://www.fight4hope.io/) Binance Smart Chain smart contract. SMCAuditors conducted the audit focusing on whether Fight 4 Hope Token smart contract is designed and implemented without any security vulnerabilities. The contract is listed below with its link.

● https://bscscan.com/address/0xa5f8128d04692656a60f17b349c2146c48e6863a

We have run an extensive static analysis of the codebase as well as standard security assessment utilizing industry-approved tools. There are no critical/high-level issues with the currently deployed token contract. Our low-level and medium-level findings are available in the next section.

2. Audit Findings

High Level Findings

- ❖ Contact ownership is not renounced. Consider renouncing ownership.
- ❖ The owner wallet contains a substantial amount of tokens, which could have a large impact on the token price if sold. Consider burning tokens.
- ❖ Contract has burn function. Consider renouncing ownership.

3. Conclusion `

In this audit, we thoroughly analyzed the Fight 4 Hope smart contract and found no critical/high-level issues.

❌	Critical issues found
✅	Owner cannot mint new tokens
❌	Owner wallet contains a substantial amount of tokens
❌	Contact ownership is not renounced
❌	Contract has burn function

4. Disclaimer

This report is not advice on investment, nor does it guarantee the adequacy of a business model and/or a bug-free code. This report should be used only to discuss known technical problems. It will be necessary to resolve addressed issues and conduct thorough tests to ensure the safety of the smart contract.
