3rd of August 2022

This document is the audit of Defihorse smart contract performed by SMCAuditors.

1. Executive Summary

Defihorse is a horse-racing metaverse based on blockchain technology, where players can buy, sell, breed, take nft horses to the races to win prizes and hosting races to make real-life profit. Defihorse Token is a BEP20 token that Defihorse players can use in the game. This report was written to provide a security audit for Defihorse (https://www.Defihorse.io) Binance Smart Chain smart contract. SMCAuditors conducted the audit focusing on whether Defihorse Token smart contract is designed and implemented without any security vulnerabilities. The contract is listed below with its link.

- https://bscscan.com/address/0x5fdAb5BDbad5277B383B3482D085f4bFef68828C

We have run an extensive static analysis of the codebase as well as standard security assessment utilizing industry-approved tools. There are no critical/high-level issues with the currently deployed token contract. Our low-level and medium-level findings are available in the next section.

2. Audit Findings

Low Level Findings

❖ Ownership has not been renounced. Consider renouncing ownership.

Medium Level Findings

❖ Token has a pause function. Consider renouncing ownership.

3. Conclusion   `

In this audit, we thoroughly analyzed the Defihorse smart contract and found no no critical/high-level issues.

4. Disclaimer

This report is not advice on investment, nor does it guarantee the adequacy of a business model and/or a bug-free code. This report should be used only to discuss known technical problems. It will be necessary to resolve addressed issues and conduct thorough tests to ensure the safety of the smart contract.
